# **Phoenix Point**

# Summary

*Phoenix Point* is a Turn Based Strategy game, very similar to XCOM: Enemy Unknown (which in turn is derived from X-COM UFO Defense). It was developed and published by Snapshot Games and got released for the following platforms:

- 1. macOS (3rd of December 2019),
- 2. Microsoft Windows (3rd of December 2019),
- 3. Stadia on (26th of January 2021),
- 4. Xbox One (3rd of December 2019) and
- 5. PlayStation (4th of October 2021).

It is a strict single-player game, featuring a single-player campaign but no instant-mission-like option. It is based on the Unity Engine.

# Purchasing

The game is currently being distributed via Steam and Epic Store. The *Phoenix Point Demo* can be obtained via Steam. There are a number of DLCs available for it:

- Blood and Titanium DLC,
- Corrupted Horizons DLC,
- Digital Extras,
- Festering Skies DLC,
- Kaos Engines,
- Legacy of the Ancients DLC and
- Living Weapons Pack.

Some of them come packaged together along with the Year One Edition:

- Blood and Titanium,
- Digital Extras,
- Legacy of the Ancients and
- Living Weapons Pack.

The Phoenix Point: Complete Edition-Upgrade contains all of them.

# Cheats

The game comes with a number of cheat codes having various effects. By default you cannot use them in-game. But you can turn them on by doing the following steps:

- Go to the Phoenix Point game folder (e.g. C:\Program Files (x86)\Steam\steamapps\common\Phoenix Point). Using the Steam function Browse local files may help with that (if you play it via Steam).
- 2. Create a new file named autoexec.cfg.
- 3. Open the file and place the line disable\_console\_access = false inside it and save it.

When you start the game now, you can activate the console with the ; key (resp. ö on German keyboard layouts), even from the main menu.

### **Adding Items**

There is quite a number of game elements, that can be added by issuing the command give\_item <item name>. The item names can be found in the Item Names article.

### **Damage Dealing**

Code	Effect
Damage <x></x>	Deal <x> Damage</x>
Damage <bodypart> <x></x></bodypart>	Deal <x> Damage to the given <body part="">.</body></x>

Body parts:

- Head,
- Torso,
- Lefthand,
- Righthand,
- Legs,
- Arms,
- Leftarm and
- Rightarm.

### Spawn in Aircraft

It is possible to add new craft to the players arsenal, by issuing the command spawn\_aircraft <craft name>. The craft name can be taken from this list:

Code	Aircraft
NJ_Thunderbird	Thunderbird
SYN_Helios	Helios
AN vars	Tiamat?

If the command is issued without any *craft name*, a *Manticore* will be added.

### **Alter Diplomacy Value**

The way how a specific faction regards another one can be set directly with the following command:

#### diplomacy\_set <faction regarding> <faction regarded> <value>

The factions used for *<faction regarding>* and *<faction regarded>* are:

- Anu: Deciples of Anu
- Anu\_faction: Deciples of Anu (also)
- phoenix: Phoenix Point
- synedrion: Synedrion
- NewJericho: New Jericho

**Note**: This has no effect on the magic steps that you have to take, in order to progress your relations further. You still have to go on missions to progress your relations with a faction to the next stage.

#### **Adding Missions**

When hovering the mouse pointer over a location spot on the geoscape, it is possible to add/re-use missions. Scavanging missions can be re-used, as well as Pandroan attacks can be cast on a haven. The command for this is:

create\_mission <missiontype> <faction>

*<missiontype>* is the kind of mission to be created:

- base: One of Phoenix Point's bases will be attacked.
- scavenging: A scavenging site gets re-activated.
- ambush: One of Phoenix Point's craft gets ambushed.
- haven: A haven is attacked.

<faction> is optional and defines, which faction is leading the assault on, resp. defending against an attack by Phoenix Point:

- Alien: Pandorans
- Anu: Diciples of Anu
- NewJericho: New Jericho
- Synedrion: Synedrion

Example: create\_mission haven alien creates a Haven mission, defending against Pandorans.

#### **Adding Soldiers**

It is possible to add units during geoscape as well as battlescape. give\_soldier <unit name> adds a soldier to your team on geoscape. spawn <unit type> adds a new unit of <unit type> on the battlescape.

#### Adding a Specific Soldier

The give\_soldier *<unit name>* command gives a very specific unit. Some are even special units as they are representing a specific character or the game's story. A list of these units can be found in

article Soldier Names.

#### Adding a Soldier Type

The *<unit type>* is a combination of faction and class, e.g. NJ\_Heavy means a New Jericho Heavy. The factions are abbreviated like this:

Abbreviation	Faction
aln	Pandorans
anu / env	Disciples of Anu
nj	New Jericho
рр	Phoenix Point (effectively adds a new unit to your own team)
syn	Synedrion
wild	Independents

The unit class can create interesting effects, when the faction actually does not have that kind of class. The used ones are:

Abbreviation	Class
Assault	Assault
Berserker	Berserker
Неаvу	Heavy (for Disciples of Anu, a fully mutated Assault class is spawned/berserker with all lvl 1 mutations)
Priest	Priest (with frenzy head mutation)
watcher	Berserker with all 3 level 2 mutations
shooter	Berserker with every level 3 mutation
Sniper	Sniper
Technician	Technician
jugg	Heavy with every level 1 augmentation
exosuit	Technician with all level 2 augmentations
shinobi	Infiltrator with every lvl 3 augmentation
godly	Heavy with 3'000 hit points and 300 strength
Infiltrator	

**Note**: Adding a unit to a faction, that you are currently fighting effectively adds another opposing unit.

### Adding Skills

In order to **temporarily** add a specific skill/ability to a unit **while in battlescape**, hover over that unit with your mouse and use teach  $\langle X \rangle$ .  $\langle X \rangle$  can be taken from the list in article Skills. After the mission the skill will vanish.

There is also a faster approach to the task: master\_specialization <*class*> gives every ability of that class. <*class*> can be taken from one of the following values:

- assault,
- ber,
- heavy,
- inf,
- priest,
- sniper and
- tech.

### **Complete Research**

Research items can be completed instantly, when using the command research complete <faction name> <research>.

9/10

Example: research complete px siren

#### **Phoenix Point Research Items**

The following items can be researched for faction px (Phoenix):
