

Armada 1 Campaign Ships

The [singleplayer campaign](#) of the game *Star Trek: Armada* features several ships, that are not part of the multiplayer, which may also serve a hero (or villain) role. They may not be available for the standard multiplayer but on custom maps and with mods these ships may very well be used for multiplayer:

Non of these ships do possess a [cloak](#). They are (usually) not constructable (they are part of the single player campaign map) but they can be used in [mods](#) and custom maps. They do have construction properties, such as Dilithium cost or build time. Some of them only appear in one single mission. Others are recurring. The [Ferengi Marauder](#) can be part of a multi-player match, if turned off during match setup. The Ferengi will tow disabled or vacated ships from the map.
