

# Armada 1 Energy Dissipator

The Energy Dissipator special weapon of the game [Star Trek: Armada](#) does exactly what the name suggests, draining the targeted ships of their special weapon energy. It is researched at the [Gre'thor Armory](#). When used, it automatically picks four targets of the surrounding opposing ships. Their special energy is being drained steadily (not all at once). It looks like this:

Property	Value
<b>Range</b>	400
<b>Build Time</b>	140 s
<b>Supply Cost</b>	10 (4.3/min)
<b>Dilithium Cost</b>	650 (4.6/s)

The Energy Dissipator also targets cloaked ships, decloaking them on impact.

An active [Corbomite Reflector](#) has no effect on this special weapon. Neither does the [Shield Remodulation](#). The [Phase Cloak](#) will protect against it.
