

Armada 1 Energy Dissipator

The Energy Dissipator special weapon of the game [Star Trek: Armada](#) does exactly what the name suggests, draining the targeted ships of their special weapon energy. It is researched at the [Gre'thor Armory](#). When used, it automatically picks four targets of the surrounding opposing ships. Their special energy is being drained steadily (not all at once). It looks like this:

| Property | Value |
|----------------|--------------|
| Range | 400 |
| Build Time | 140 s |
| Supply Cost | 10 (4.3/min) |
| Dilithium Cost | 650 (4.6/s) |

The Energy Dissipator also targets cloaked ships, decloaking them on impact.

An active [Corbomite Reflector](#) has no effect on this special weapon. Neither does the [Shield Remodulation](#). The [Phase Cloak](#) will protect against it.
