

Armada 1 Energy Shield Converter

The Energy Shield Converter is a special weapon of the game [Star Trek: Armada](#). It is not actually a weapon but more of a special ability. It reloads the shields of a friendly targeted unit or building. The casting ship's special weapon energy is drained at the same time. This helps to restore buildings or ships fast. It is researched at the [Tal Shiar Facility](#). It looks like this:

Property	Value
Range	300
Build Time	140 s
Supply Cost	10 (4.3/min)
Dilithium Cost	525 (3.8 1/s)
Special Energy Cost	33/s

The Energy Shield Converter converts special energy of the source into shield energy of the target at a rate of 44 shield energy per second while draining 33 energy per second. That makes the conversion rate roughly 1.3 shield/energy and restores up to 1325 shield until energy runs out. It can only be used on friendlies.
