

# Armada 1 Hero Ships

The [singleplayer campaign](#) of the game *Star Trek: Armada* features several ships, that are not part of the multiplayer, which may also serve a hero (or villain) role. They may not be available for the standard multiplayer but on custom maps and with mods these ships may very well be used for multiplayer:

These ships are in general very powerful in comparison to their ordinary counter part, that can be produced during the singleplayer or multiplayer. Very often they also have **special weapons** available right away or even more features such as a **cloak**, where the ordinary ships of their kind do not have it.

Although they are (usually) not constructable (they are part of a single player campaign script), they can be used in **mods** and do have construction properties, such as dilithium cost or build time.
