

Armada 1 Mining Beam

The Mining Beam is a special weapon of the game [Star Trek: Armada](#). It is actually not a weapon in the conventional sense. It's the means with which [freighters](#) of the game mine the dilithium from the corresponding moons. It is automatically used, when sending a freighter to a [mining station](#) or dilithium moon. It looks like this:

Property	Value
Range	120
Build Time	0
Supply Cost	0
Dilithium Cost	0
Special Energy Cost	0

The increased firing rate caused by a [Death Chant](#) also affects the Mining Beam, increasing the output rate by 50%. When having less than 3 [freighters](#) at a [Dilithium Moon](#), this may boost income rate. If you already have 3 or more freighters at one moon, there is little point in using this method, as the processing speed of [mining stations](#) is not increased, making them the bottle neck.
