

Armada 1 Sensor Stations

The sensor stations of the game *Star Trek: Armada* are the eyes of the player. Their scanning range of 1000 is the highest in the entire game. When enhanced with a [Tachyon Detection Grid](#) they can even uncover [cloaked](#) ships. This makes them the ideal surveillance tool. Their shields are with a value of 1000 not too low, but they won't hold out long against an attacker. Their only drawback is their lack of an offensive system.
