

Games Database

Here I started to create a games database, intended to collect information on how to get games to run (especially older games on newer systems) and what might be important during setup. For some of those games, there are also some [dedicated servers](#) running on this machine. Their status can be seen [here](#). Information surrounding the whole computer game topic that's not directly about specific games is also available. For more background information see also [About this Wiki](#).
