Easy to install: You don't need a crack or anything. This was from a time when the term „copy protection“ was not known for CDs, because nobody had a cd burner anyway. You can even play it without a CD, but then without music. The music is also not heard if a virtual drive does not occupy the first drive letter among CD/DVD drives on the computer. But in my opinion it doesn't hurt the game experience. The game can be installed in DOSBox but apparently playing only seems to work out rarely.

Network

The game requires IPX!
